ruslankomplekt.com

HISTORY OF THE COMPANY

Production facilities of “Ruslan-Komplekt” are located in the area of 10,000 m² consisting of six workshops are equipped according to modern international standards.

There are 40 presses, the weighing from 6.3 to 400 tons in the cold sheet pressing. The foundry shop produces iron, steel, and aluminum castings.

The electronic design, a 3D model, appropriate tools together with the CNC make it possible to produce on this type of machining equipment high precision hardened parts.

The newest modern CNC controlled machines and qualified specialists make it possible to produce molds and complex dies weighing 1.5 tons. LLC “Ruslan-Komplekt” places emphasis on low-waste and non-waste production, unification of equipment and improving its durability.

Ruslan Komplekt considers every opportunity for cooperation from minor projects to the full production of molds and dies, with their further testing and delivery to the customer.

Customers can ask us to produce their products on our equipment, and we guarantee them manufacturing the required number of high-quality products.

The company has several assembly shops: repair kits assembly and lighting assembly.

On the whole, the quality of the lightning assembly works strongly affects the reliability, performance, and durability of products. Therefore, after assembling the product must go through quality control to check if it fits the parameters of rubber products.

To assemble repair kits, “Ruslan-Komplekt” uses rubber products by Belotserkovsky Rubber Technical Goods Plant (INTER-RTI), Sumy RTI plant, and Mariupol RTI plant.

The products from suppliers go through careful quality control in our own laboratory and only after that are sent to the assembly shop.

HISTORY OF THE COMPANY

The company was founded in 2006. In 2007 we started the mass production of sealants from polymeric and composite materials.

Since 2009, the company has been working on a closed-cycle technology - from the design of production tooling to the manufacture of serial products.

At present, the range of products comprises more than 4,000 items. All products are certified and meet the state and international standards.

Our main activity is the production of polymer sealants for hydraulic and pneumatic cylinders.

hydrosila.com

HISTORY OF THE COMPANY

"Hydrosila-Tetis", LLC is a structural group of the largest producer of hydraulic power machines and their components - PJSC Hydrosil Group.

The company "Hydrosila-Tetis", LLC began to manufacture products in the "MZTG" OJSC. There was a workshop for the manufacture of parts for hydraulic cylinders.

From November 14, 2007, Hydrosila-Tetis LLC. was allocated to a separate enterprise that specializes in the production of hydraulic cylinders for various types of agricultural machinery.

From May 1, 2008, Hydrosila-Tetis LLC began manufacturing products with a total staff of 96 people. The enterprise had 237 units of equipment on technical equipment, produced hydraulic cylinders of the type: C100h200-3; C75x110-3; C75x200-3; BDU 10-6A and MЦ75 / 30x200.3

The sharp increase in the demand of power units for tractors in the agrarian industry of Ukraine and the countries of the near abroad caused further growth of volumes of hydraulic cylinders produced by the enterprise. The nomenclature of hydraulic cylinders manufactured is constantly increasing.

By 2018, the number of equipment is 360 units.

For the period 2008-2018 more than 1000 new types of hydraulic cylinders are developed and introduced into production.

Today, Hydrosila-Tetis LLC. produces piston double-acting, plunger, telescopic and special hydraulic cylinders. Hydraulic cylinders are manufactured in various modifications and sizes. Piston hydraulic cylinders with a diameter of 25 to 240 mm and a piston stroke of 100 to 2000 mm. Plunger cylinders - diameter 63-80 mm. Hydraulic cylinders are designed for nominal pressure from 16 to 32 MPa.

The company's structure for 2018 includes 8 production sites and auxiliary services with a working capacity of 264 people.

At the enterprise since 2013 a quality management system certified by LLC Bureau Veritas Certification Ukraine as implemented in accordance with the requirements of the international standard ISO 9001. In 2018, the company confirmed the compliance of the QMS with the requirements of the international standard ISO 9001: 2015.

Currently, the company pays great attention to improvement of working conditions, improvement of quality, implementation of the system "Ordering", introduction of modern technologies, equipment upgrades.

The issues of the social sphere are not left out. Every year employees of the company are given trips to the recreation center, and for children a trip to a children's health camp. The company regularly participates in regional, state and international exhibitions of agricultural machinery, is engaged in the development and introduction of new types of hydraulic cylinders.

HISTORY OF THE COMPANY

The main types of products are clutch discs, castellated shaft, semi-axles, gears and clutches for agricultural machinery.

Extensive experience and accumulated knowledge in the production allow the enterprise to offer customers competitive prices and make their products available in the markets of Ukraine, CIS countries and in a number of far abroad and neighboring countries.

Advantages of spare parts produced by TM TARA:

They fully comply with the requirements of engineering documentation, state, and industry standards

They are produced on modern metalworking equipment

They are made of high quality certified metal that is supplied directly from the metallurgic plant

They are subject to rigorous multi-level technical control.

HISTORY OF THE COMPANY

The company "Avtoprivod" LLC was founded in 2007 with the aim of mastering the production of automotive components to the internal combustion engines of heavy vehicles, tractors and combines. The company is equipped with modern metallurgical, metalworking equipment from HAAS, HELLER and OKUMA, which allows it to work efficiently with high quality products. The team of specialists has many years of experience in the field of mechanical engineering and is able to solve complex technical problems. The intellectual property of an enterprise is protected by patents for inventions and utility models. The enterprise confirms its high status with the received certificates and diplomas of the GAZ Group.

The company is a strategic partner of PJSC Avtodizel (YAMZ) and the Power Units Division of the GAZ Group, Yaroslavl and manufactures the following products: viscous radiator cooling sleeves, water pumps, engine emergency stop valves, engine brake valves, exhaust gas recirculation valves, service module housings, etc., which are installed on gas and diesel engines of EURO-3, EURO-4, EURO-5 and EURO-6 standards. Most of the products are supplied to the GAZ Group conveyor.

In addition, the company achieves high quality indicators due to the availability of a certified quality management system ISO 9001, ISO 16949, its own certified laboratory, providing full control and testing of products.

The products of Avtoprivod Ltd. are distributed through its dealer network in Ukraine, Russia, Belarus and other CIS countries.

HISTORY OF THE COMPANY

2008 The Group of companies "Turbocom" started work in 2001, when its founders Volodymyr Ovcharenko, Ihor Lyutiy and Vitaliy Plakun decided to repair turbocompressors. The key point of the company's development is the transition to the own production of turbocompressors under TM "TURBOKOM".

2008 Large-scale expansion of territories
Purchase of the first turning center with CNC

2012 21,000 turbocompressors. 5,000 medium-sized buildings. The production area is 1000 m². 100 employees on the staff

2014 The launch of non-ferrous castings shop floor. The opening of the first service center.

2017 42 500 turbines. 5,000 medium-sized buildings. The production of non-ferrous alloys reached 600 tons of casting yield per year. The production area is 8 500 m². A team of 350 employees

2018 The launch of an environmentally friendly cast iron foundry plant - "Ekopromlit Plant" as part of the Company Group . "Turbocom" produces 3,600 tons of casting yield per year. 22 new turbomachines are launched into mass production

Turbocom: A plant of turbocompressors for a wide range of automotive and agricultural equipment.

Serial manufacturer of turbocompressors for vehicles of such brands as: "Bohdan", TS, GAZ, PAZ, KAMAZ, MAZ, MMZ, ChTZ
Mercedes, Audi, Volkswagen, Renault, Ford, Tata, Foton

THE MAIN ACTIVITIES OF THE COMPANY

- Development and improvement of turbocompressors production
- Production of non-ferrous casting
- Production of non-standard equipment
- Production of steel and cast iron
- Production set up of heat-resistant casting
- The opening of a global network of service centers and representative offices
- Launch a single long-term marketing and PR strategy
- Development of social projects to support the community

HISTORY OF THE COMPANY

PLC "Melitopol Compressor" (Melcom) is a leading enterprise of the CIS in the field of compressor engineering.

Founded in 1930, the plant has been developing and producing high-quality compressor and pumping equipment with a wide range of technical characteristics for more than 80 years.

The equipment from Melitopol compressor trademark was used during the launch of the spaceship with Yuriy Gagarin on board, in the first round-the-world cruise of a nuclear submarine "Leninsky Komsomolets" and in the construction of the nuclear-powered icebreakers "Lenin" and "Arktika".

Melkom products are well-known and appreciated in many countries around the world.

The improvement of the manufacturing process enabled us to reduce maintenance and power costs. The beginning of the 21st century is a new stage in the qualitative development of reciprocating compressors produced by Melkom. The plant works in the conditions of growing competition with the producers of screw compressors.

The enterprise pays much attention to the quality of the product. Since 1996 the plant has a test laboratory accredited for technical competence in the system of UkrSEPRO in the field of compressor equipment, vacuum pumps and spare parts for them.

Accreditation Certificate No UA 6.001. T. 365. All products of the enterprise undergo certification tests. The quality is confirmed by the certificate that conforms security requirements of UkrSEPRO and is recognized in CIS countries.

PLC "Melitopol Compressor" is the leader of the compressor production in Ukraine and CIS countries. Our core priorities are choosing a promising direction for product development, proper problem setting and finding optimal solutions to these challenges.

HISTORY OF THE COMPANY

LLC Termolit was founded in 1996 by leading experts of OJSC "DagZETO" (Dagestan electrothermal equipment plant").

In January 2002, at new production facilities, we began mass production of ITPE furnaces. Another new development department enables us to develop and launch new equipment into mass production. That allows us to increase the range of products and meet the growing demand of the enterprises in Ukraine and CIS countries.

In 2007, we completed the development of new power sources for induction heating – transistor frequency converters.

This year we have put into production a number of induction heating systems for:

- heating long workpieces for winding springs
- annealing pipes before profiling
- heating the heat carriers of the Azmol plant
- heating and hardening chains

Currently, LLC Termolit is a dynamically developing, modern, and high-tech enterprise with highly qualified specialists. It is a research and production complex with a full cycle from the generation of technical ideas to their realization in production.

LLC Termolit specializes in the design, manufacture, and supply of the following equipment:

- Induction crucible electric furnaces
- Heating and hardening units
- Thyristor frequency converters
- High-frequency transistor generators

In addition, we can develop and manufacture any types of induction heating devices and small-sized high-frequency generators for surface hardening parts according to the individual technical requirements of the customer.

The management of LLC Termolit together with leading experts is conducting continuous work on improving the quality of products. We follow all the innovations in our industry and try to introduce the latest technologies in the production of induction melting furnaces. Our core principles are the continuous improvement of the technical level of products and customer satisfaction.

ukrfavorit.com.ua

HISTORY OF THE COMPANY

The company "UKRFAVORIT" was founded in 2008 in Donetsk by Elena Isaeva and Isa Isaev. The company was established to provide the Mariinsky Casting and Mechanical Plant with the required materials for casting. While working they became more professional and knowledgeable in all aspects of the foundry business. As the production volumes increased, our company was noticed by the UK company Ashland and the company executives offered us to become a partner of Ashland in Ukraine.

In 2009, we created a technical department where two technologists worked. The objectives of the technical department were the installation of equipment, launching, and adjustment of the technological process at the client's plant.

In 2010, our company entered a partnership with major German equipment manufacturers FAT and Laempe. With the growth of the turnover, the company was developing, too. In 2010-2013 UKRFAVORIT got new customers - large plants operating in the cold hardening mixtures process.

During this period, we increased the storage space from 400 m² to 2,000 m². In 2014, all enterprises engaged in casting in the region had to shut down because of the war and the start of the anti-terrorist operation. Therefore, we decided to evacuate the company and employees to Melitopol. In spite of the difficulties, we managed to increase our sales.

Since August 2016, Ukrfavorit LLC is the official exclusive representative of EUROTECH FOUNDRY PRODUCTS LTD (UK) that specializes in the manufacture and sale of high-quality chemical components for the foundry industry worldwide.

Then-and-now our core principles were to provide the foundry workers with advanced technologies and use the experience and traditions of the British foundry industry in our work.

HISTORY OF THE COMPANY

Our enterprise is the only manufacturer in the CIS that has a closed production cycle of hoses and coupling hydraulics. There are 50 people working at our enterprise.

We have more than 200 units of technological equipment and various production lines, 90% of which is of high quality and produced in Germany, Italy, England, Taiwan, Japan, and other countries in 2009-2013. Since 2009 and until now we have been carrying a large-scale modernization of technological equipment, and extend our assortment by introducing new product groups.

Product quality control is carried out in two stages with measuring instruments (brackets, plugs, etc.). The first stage is directly checked by the equipment operator, the second stage is monitored by the Quality Controller after electroplating.

Application of our products:

- ore-mining equipment (mechanized lining, tunneling machines, water lines and other hydraulic equipment for mining machines and mechanisms)
- road engineering, drilling, construction and municipal equipment (excavators, bulldozers, loaders, graders, truck cranes, tractors and cars)
- agricultural machinery (tractors, combines, cars, and attachable equipment)

The main advantages of our production:

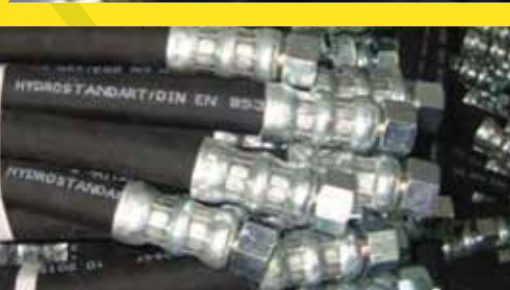

Closed production cycle

European quality

Modern equipment and technology

Production according to customer's specifications

Flexible and convenient cooperation

HISTORY OF THE COMPANY

In 1993, the founder of the company - Vadym Viktorovych Ostroverh, guided by the idea of creating quality spare parts, organized the production of pistons and cartridges for the car ZAZ-968, thereby initiating the company's activities. The main task was to manufacture spare parts with the maximum possible lifetime to meet the needs of the most demanding customers. In 1996, during the study of the market, it was discovered that the problem of low-quality spare parts sharply affects the segment of agricultural machinery. In this connection, the production of pistons for tractors is underway. With increasing production, the range of products was expanded as well. The enterprise began to produce spare parts for commercial vehicles. In 2016, the modernization of the main production was carried out - the priority direction was the manufacture of piston groups. In the same year, production capacity has increased significantly. Today the company's products are delivered to more than 25 countries, as well as actively gaining market of Ukraine. The irreplaceable rule is the perfect combination of piston, piston pin and sleeves with each other. The main desire of the owner of the company is to dominate Ukrainian products on the market, and directly to Melitopol became pride, as the best domestic producer. PE "Zavod Motor" is a member of a group of companies, which consists of the plant "Mriya" Ltd. and agricultural enterprise "East" Ltd. Together they form the Engineer Factory Production Association. The purpose of the company is to "produce reliable spare parts, contributing to the development of agrarian business and the economic well-being of each consumer."

HISTORY OF THE COMPANY

CG "Melitopol Cherry" - is an agricultural enterprise specializing in the cultivation of products in two areas: cultivation and horticulture.

The company was founded in 2002. The general land bank is about 15 thousand hectares and is represented in three regions of Ukraine: Zaporizhzhia, Kherson and Kharkiv regions.

Due to the special climatic conditions, sand and chernozem soils, innovative technologies, the availability of its own research base, technologies of intensive production, the application of an integrated system of plant protection, drip irrigation, the presence of nurseries and the transition of cultivation of products in greenhouse tunnels, the group of companies Melitopolskaya chereshnya is the leader of the cyclical development of regional systems of agricultural production.

The mission of company: By studying, preserving and multiplying experience, traditions, knowledge and technology, we form a culture of production, create unique products. We take part in organizing activities for the population.

CG "Melitopol Cherry" devotes a lot of time and charity. We are improving ourselves by perfecting the world.

- Active support of sports through financing of the city football club "Melitopol Cherry";
- Sponsorship in conducting the All-Ukrainian Tournament from the free fight "The Cup of Melitopol";
- Sponsorship in the triathlon competition "Tournament of Generations";
- Sponsorship in auto rally "The Road of Victory" in memory of those who perished during the Second World War;
- Conducting the "Chereshnevo" festival;
- Support for the project "The Most Beautiful Women of Ukraine".

HISTORY OF THE COMPANY

Ltd. "GIDROVIT" is a leading manufacturer of hydraulic cylinders for various branches of mechanic engineering in the Ukrainian market. Fifteen years of experience enables our company to meet international quality standards. We respond to the innovative developments of hydraulic products and use new technologies in our production.

Our major specialization is the production and sale of hydraulic cylinders. The company manufactures hydraulic cylinders which are applied to the post-Soviet equipment and its modern analogs. In addition, we produce hydraulic cylinders according to the customer's individual design, drawings, or technical specification.

We have experience in the production of hydraulic cylinders for mining equipment, metallurgical plants, agricultural machinery, utility equipment, boats, special lifting equipment and many other sectors where hydraulic cylinders can be used.

HISTORY OF THE COMPANY

LLC Metallist is one of the leaders in the production of spare parts for the K-700, K-700A, K-701, K-702, K-744 tractors and their modifications, and spare parts for machinery and special equipment based on the tractor model "Kirovets".

Metallist began working at the Ukrainian market in 2001. The main focus of our activities is the production of spare parts for the "Kirovets" tractor (K-700, K-701), the production of replaceable cutting-tool knives for the combines Don, Niva others.

The company sells spare parts for tractors "Kirovets", and special vehicles based on K-700, K-701 models.

We manufacture our products according to the highest quality standards. We modernize our shops, and use new production technologies to achieve that. All our products are certified in accordance with the state standards.

Today Metallist is a modern, dynamically developing enterprise. Melitopol has a spare parts warehouse for the "Kirovets" tractor (K-700, K701), which significantly reduces the delivery time and speeds up the work of the sales department.

The main production facilities of the enterprise are:

- Blank section;
- Forge and press production;
- Mechanical assembly shop;
- Heat treatment area (high-frequency hardening; mine furnaces for bulk hardening; tempering and cementing furnaces; a welding area and others).

We always cater to the clients' needs, that makes us a more attractive company. A wide range of high-quality products, deferral of payment for regular customers, and the delivery to any part of the CIS in the shortest possible time are the main advantages of our company. Another benefit for a client is a flexible pricing system. We do hope that our offers will interest you.

HISTORY OF THE COMPANY

Prior to A.M.P.Hydro, my partners and I worked in senior positions at the leading enterprises of Ukraine that produce hydraulic cylinders.

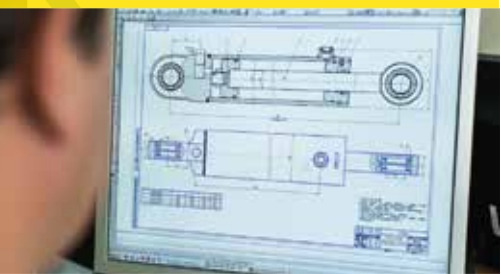

We have long wanted to enter the European market, but cooperation was difficult.

For a long time, we have tried to enter the EU market but it was difficult to establish cooperation with international companies. Therefore, we decided to create an enterprise in Ukraine that would work according to the European format. Our task was to keep pace with the EU market. We have succeeded!

To improve the production, we considered the customers' needs and best business practices in the EU. As a CEO, I improved my knowledge of the industry as well as upgraded my English so that to be able to establish foreign business connections effectively. Moreover, I trained my team for working in the EU market.

However, most importantly, we are convinced of the quality of our products and are happy to make free test samples, and we are developing technical documentation for free.

Today A.M.P.Hydro is one of the most "convenient" manufacturers for EU enterprises. We have optimized our pricing policy and offer reasonable prices which are much lower than in Europe. We execute the orders within 3-4 weeks! Our free offerings are technical documentation and samples. We ensure the high quality of our products!

HISTORY OF THE COMPANY

For the 18 year period, our company has experienced a lot of different events and gained many achievements, too. We survived the crisis of 2004 and 2008 when the dollar rate grew from 4.5 to 8 UAH and from 8 to 27 UAH relatively. Despite the fact it was an extremely hard time for us, we have coped with all the difficulties.

Within 18 years, we have extended the production areas from 700 m² up to 4000 m². First, we rented a 200 m² room and then moved to a 700 m² office which we bought out later.

In 2001 we had 12 units of equipment. And now there are 100 units in our company. During 2004-2007 were purchased 5 CNC machines on credit. The credit amount for the equipment and the working assets was about USD 200,000. Fortunately, in 2013 we were able to repay all loans.

Over the past five years, our engineers and other specialists have learned to manufacture high-quality boilers of different types within a short time. Also, we produce accumulator tanks, hydraulic separators, and distributors. However, we need to extend the range of the above-mentioned products as well as improve their external design.

In 2016, we sold the first industrial boiler that enabled us to develop in a new direction. We continue to produce boilers with the capacity of 100-150-200 kW. Currently, our experts are developing a 400 kW boiler. Also, we plan to produce 500, 600, 700 kW boilers. The design of the boilers is constantly being improved. We keep on developing! We can boast many achievements within this time. We are a team of true professionals in comparison with other companies in the industry!

HISTORY OF THE COMPANY

Since 2008, the company together with KB "Berdyanskselmash" has mastered the mass production of the rapeseed header extension for harvesting small seed crops by domestic and imported combines, which reduced the loss of rapeseed during harvesting by 30-40% and significantly increased the productive efficiency of combines.

The company pays great attention to the improvement and development of new types of agricultural machinery.

In 2008, the company started to use imported components from Germany, namely Pro-Drive 85MVv, a planetary gearbox from SCHUMACHER; electrical and hydraulic drives of rapeseed divide RT 135 by ZIEGLER, Germany which made it possible to significantly increase the productivity of agricultural machinery and increase its reliability and competitiveness.

Since 2014, the company has been independently producing sunflower headers of Fast Stream models.

6; 7.4; 9.1; single-axle and double-hitch header transport trolleys for FST 1 and FST 2 models; and rapeseed headers with hydro and electric active dividers.

Our equipment is used in various regions of Ukraine, Russia, Kazakhstan from Novosibirsk and Petropavlovsk to Lutsk and Lviv. MELITOPOL AGROINDUSTRIAL COMPANY traditionally takes part in exhibitions AGRO 2007, AGRO 2008 (Kyiv) Golden Autumn 2008 (Moscow), Yugagroprom (Krasnodar), Golden Autumn (Barnaul) and many others.

HISTORY OF THE COMPANY

ROSTA Scientific Production Company was founded in 2000 in Melitopol, Ukraine. Launching of own production caused more active approach to finding and expanding of the trade area for the products. Rhythmic production work required harmonious interaction of all employees of the company.

Therefore, along with the launch of production, the structuring of company departments was carried out. Since that time, we have the following subdivisions: manufacturing, agrotechnological, logistics, training and research center.

All of them are aimed at the development, testing, production, training and formation of own distribution network.

Production, the complexity of its products and technologies always corresponded to the level of consumers's request and often went ahead of them.

Development of technology in vegetable growing causes the application of appropriate technology. With the development of vegetable production on an industrial basis, we have been developing the respective machines that perform the various processes in horticulture.

Designing our machinery, we aim to take into account international experience and ensure the machines quality at the highest world standard level. Our products have been patented in the CIS countries, the European Union and the United States. The European certificates have been received.

Today our products are well known in many countries around the world. The ROSTA Europe ST company has been organized due to access to the international level of our products and increase of its demand.

Complication of the machinery and stricter requirements for its quality, cost and competitiveness entail continuous improvement of processes in its production and labor organization.

Our production has a complete set of equipment of any complexity for the release of more than 100 items of machinery and equipment for vegetable production and drip irrigation systems.

The whole process of machinery design and setting is accomplished in electronic form on a software, specially designed and adapted for our conditions.

Especially high requirements are lodged to engineering and technical staff.

Today, enterprise-based seminars and trainings on our products are held, farmers and distributors from many countries as well as the representatives of leading universities taking part in them.

The task of the ROSTA company is timely and quality service of vegetable production distributors and manufacturers in Europe, as well as consulting and training at the place of our product use.

HISTORY OF THE COMPANY

The history of Melitopol oil extraction plant began in November 1934 when a private oil mill was founded by entrepreneurs Vorobiev and Roberts.

1939 - The oil mill was reorganized into an artel "Promzhir" daily processing 35 tons of sunflower seeds.

1944 - The cartel was reorganized into a state cotton and sunflower seeds processing plant.

1996 - The privatization of the plant

1998 - The plant was put into operation after restoration and renovation.

2009 - A hydrogenated fats shop with a capacity of 100 tons per day was put into operation.

2014 - The reconstruction of the plant increased production capacity starting from receiving of raw materials to the filtering and storage of sunflower oil. A new press section, as well as a modern filtration section, were installed and put into operation.

2016 - The conversion of the hydrogenated fats shop in the shop for the production of refined deodorized frozen sunflower oil.

2017 - The installation of the bottled sunflower oil production line (1 and 5 liters).

HISTORY OF THE COMPANY

Melitopol bread-making complex was founded in April 1961. The enterprise is located in the industrial zone of Melitopol occupying the area of 2.08 hectares.

Previously the design capacity was 26 tons of bakery products. Today we produce about 30 tons. That enables us to provide our products for the entire city and the neighboring area within a radius of 25 km.

In 1996, according to the decision of the Regional Branch of the State Property Fund of Ukraine of June 27, 1996 No. 983, Melitopol bread-making complex was transformed from a state enterprise into an open joint-stock company (OJSC). After privatization and transformation into a joint-stock company, the company significantly expanded and updated its product range.

In March 2008, after the liquidation of OJSC Melitopol bread-making complex, LLC Melitopol bread-making complex was established.

Since August 2015, the company entered the group of companies "Khibodar", established in 1997. Today it is the largest supplier of bread and bakery products in Zaporizhzhia, Kherson, and Dnipro regions.

Today LLC Melitopol bread-making complex is a modern enterprise with highly mechanized automated production, high standards of quality control of raw materials and finished products, and highly qualified personnel.

We have completed the reconstruction of the main bread shop including the replacement of equipment. Soon we are going to renovate a small-piece products shop.

Melitopol bread-making complex works according to the requirements of Hazard analysis and critical control points system (HACCP) to meet the needs and expectations of consumers regarding safety and product quality, create a positive image of the company, and increase competitiveness.

In 2018, we expect to receive the certification of this system. Our products are positioned under two brands TM "Khibodar" and TM "Melitopol bread-making complex".

The enterprise is located at the address: Melitopol, 8 Marta Street, 2

HISTORY OF THE COMPANY

A confectionery enterprise "ARIS" was founded in 1998. In the beginning, the founder could not bring the idea to life. Initially, we studied thoroughly the experience of other industry producers at the domestic and foreign markets.

We had to make the first extruder on our own hands according to the drawings.

In 2001, the company became the owner of a production facility, and in 2003, a ring-shaped roll machine was launched. In the same year, we registered a trade brand "ARIS".

In 2004, we launched the line for the manufacture of all favorite crackers with raisins.

In 2005, consumers tried for the first time sticks produced by "ARIS".

Now in the staff of "ARIS" is about 300 qualified employees. At the same time, the total area of the premises is almost 3 thousand m².

Bakery production is aimed at making treats familiar to the population of Ukraine since childhood: crackers with sugar dressing, crackers with raisins, ring-shaped rolls in an assortment, corn sticks, sticks, and breadsticks. The list of bakery products pleasantly surprises with its diversity.

The list of bakery products today includes 8 basic products and 45 varieties of them.

LLC ARIS is constantly developing social infrastructure, in particular, life and production conditions (we provide coolers, air conditioners, and devices with carbonated water machines). Every year our employees and their families relax and improve their health at the recreation center in Kyrylivka on the Azov sea coast.

Our partners are enterprises from all regions of Ukraine who appreciate our company as a reliable supplier with an impeccable reputation and organization of production. We supply bakery products at a due time. Prices for the whole range of the baked goods are reasonable. All this makes our partners get assured that they have made the right choice.

HISTORY OF THE COMPANY

Dynamically developing company "VRM-AHRO" LLC is located in Melitopol Zaporizhzhia region - the agricultural sector of the South-East of Ukraine. Favorable climatic conditions and high environmental friendliness of this area allow us to collect high-quality product in large volumes. "VRM-AHRO" LLC started its activities in 2008 as a small private company. We collected and tested honey for the main Ukrainian honey exporters. Primarily, the volume of buying honey was no more than 300 tons per year. Due to competent approach to the work organization the sales between our trusted partners, the volume of purchases and the number of clients grew. By 2013 we set up branch offices in 12 regions of Ukraine which allowed us to broaden the range of purchases. The volume of purchases:

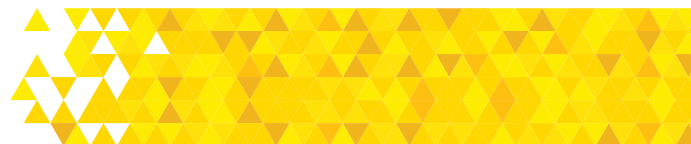

- 2012 – 1 thousand tons;
- 2013 – 1.5 thousand tons;
- 2014 – 3.5 thousand tons;
- 2015 – 5 thousand tons;
- 2016 – 6 thousand tons;

At the end of 2016 we have successfully entered foreign markets and reach our main goal – direct sales of honey, without the chains of mediators. Currently we are working with countries such as: Poland, Bulgaria, Germany, Czech Republic, Romania, the USA and others. In order to monitor quality of product at all the stages of the manufacturing, we established own innovatively equipped laboratory where the product is carefully checked and controlled. At the moment, "VRM-AHRO" LLC is a dynamically developing company that combines the whole complex of services in: collecting, testing, storage and logistics - the delivery of honey to the client. We are ready to cooperate with honey traders all over the world, that's why we offer you the following:

- Natural honey, free of forbidden substances according the requirements of DSTU (National Standards of Ukraine) 4497:2005, EU and USA quality regulations.
- Team of professionals which guarantee cooperation between buyer and supplier on an individual basis.
- The perfect price and product quality balance.
- Full compliance with the legislation and needed package of documents.
- Direct delivery to the buyer with help of reliable transport operators.
- Long-term and reliable partnership.

HISTORY OF THE MELITOPOL CITY

MELITOPOL IS A RELIABLE PARTNER AND A HOSPITABLE HOST

The name of the city has Greek roots: melitos means honey.

Due to the construction of the railway in 1874 our city got the development impulse.

Melitopol turned into a major industrial center of Zaporizhzhia region in the twentieth century from a small provincial town with a population of about 15 thousand people.

Every spring in Melitopol there is a citywide celebration of Easter in Intercultural City. The event is organized by the Association of national and cultural societies of Melitopol. Representatives of many ethnic communities in national costumes one by one tell their guests about traditions and legends, then treating to their national dishes. For centuries representatives of about 100 nationalities peacefully coexist here.

SIGHTS OF MELITOPOL

Since June 2011, there has been festival in honor to the famous sweet cherry, called "Chereshnevo". The costume parade of citizens of all ages pass along the central streets, a special prize is taken by a citizen with the most original accessory associated with the cherry. In the city there are Gorky park "sweet" workshops, handicraft fairs, where everyone can try freshly made cherry jam right in the park are annually performed. Local companies provide free distribution not only of jam, but also of some other desserts.

City recreation and entertainment park named after Gorky, which is located in the city centre, appeared on the place of former wasteland. The park construction began in 1926 by the initiative of Berdyansk forester chief Ivan Alexeev with the support of the city municipality. In 1960, the park received the status of a monument of landscape architecture of Ukraine. There are open air movies and municipal brass band performances in summer.

In the park of the Irrigation Horticulture Station, where more than 30 species of fruit trees grow, the residents and visitors can experience a beautiful view of hundreds of flowering trees.

Since 1933 there have been created 12 new sweet cherry sorts, Valery Chkalov is considered to be the most famous one. There have been collected more than 3 000 sorts of fruit and berries in the Institute.

The archaeological exhibits of the Melitopol museum of local lore are unique. Today you can see forty-five thousand of different exhibits in the museum. The collection of Scythian gold (dated 4 c. BC) which was found as a result of an excavation of the Melitopol barrow in 1954, is one of the most valuable exhibits.

Expositions of Kale Ethnographic Centre tell about participation of Melitopol in the program "Intercultural cities" of the Council of Europe. Our city takes part in it since 2008.

There is a monument in the city to the Ilf and Petrov`s character Ostap Bender. In the book his "neighbour" considered Melitopol is the one of the capitals of the world culture.

CITY TRADITIONAL HOLIDAYS AND FESTIVALS

May - Intercultural Easter in Intercultural City

May - National festival of brass and variety music «Tavriski surmy»

June - Annual Cherry City Festival

August - Annual Honey City Festival

September - City Day
